IN THE SPECIFICATION:

Please amend the paragraph starting at page 10, line 11 and ending at line 16, as follows:

--Among these cationic substances, there is particularly preferred a cationic resin such as a polymer or copolymer that includes as a skeleton an alkyl (meth) acrylate quaternary ammonium salt having a benzyl group or an alkyl (meth) acrylamide quaternary ammonium salt having a benzyl group ~~an alkyl (meth)acrylate quaternary ammonium salt having a benzyl group, or a cationic resin such as a polymer or a copolymer including an alkyl (meth)acrylamide quaternary ammonium salt as a skeleton~~. In case of employing an anion (borate ion) for forming a salt with a metal ion as in the following example, such cationic polymer or cationic organic substance is preferred for obtaining the aforementioned cation distribution.--
